SECRET
CENTRAL INTELLIGENCE AGENCY
Deputy Director for Operations

13 January 1984

NOTE FOR: DCI
DDCI

Bill:

I have gone through your letter to the President (attached) for the purpose of excising those references to DO activity which I think you should omit in any talk provided in the auditorium. I have also modified the language in several places to permit the inclusion of a thought in what I believe to be an essentially non-sensitive manner. I have tried not to emasculate your paper--and I think I have not done so.

As I told you orally, I have no problem in an unedited version of this paper being shown to the key members of our oversight committees or to appropriate persons in the Executive. For their purposes, there is nothing that I feel they need not know--nor do I find the language too source revealing. I feel strongly, however, that if they are given the privilege of reading the unedited

version, they should not be given the privilege of retaining a copy, I would be glad to provide "baby sitters" while the document is read, so that they can bring it back to this building.
